

Just another RENA installation.  
Nothing special.

 ozonetech.

<b>Name</b>	Eclipse

<b>Cleaning purpose</b>	Minimizing odor and the risk of fire
<b>Requirements</b>	Do the job. Close to 100% uptime. No hassle.
<b>Yacht owner</b>	Chelsea FC owner
<b>Owner satisfied?</b>	Yes, very. Eclipse is all about perfection. This also goes for the kitchen duct cleaning system.

We have replaced many existing non-working systems. Even at sea.

Our RENA Kitchen solution was longed for.

The team on Eclipse was not pleased with the existing ozone generator. Frequent breakdowns and expensive replacement parts was a constant concern.

That's history now. RENA is a high-performance system. Oxygen fed, not air-fed. Cooled with liquid, not air.

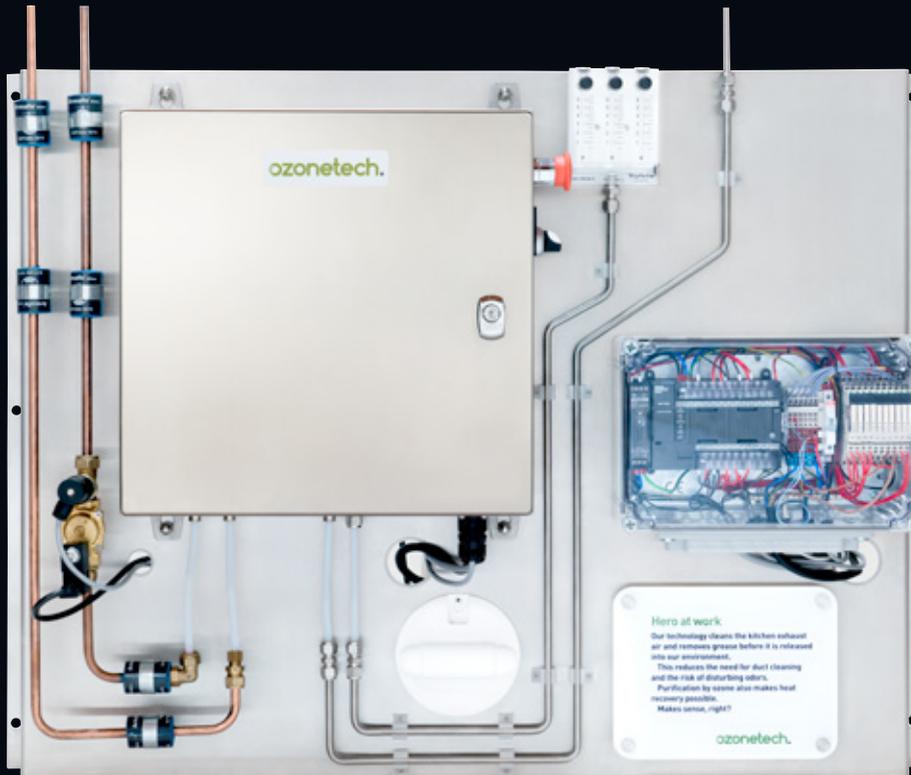

It works. Day after day, year after year.

Choosing RENA means buying peace of mind. One annual supervision is usually sufficient. The system comes with life-time product guarantee and remote monitoring from our Service Center.

We ship to any port. Just give us a call.

RENA Kitchen solutions. The high-performance ozone system.

## About Ozonetech

Ozonetech is an award-winning greentech company that has offered premium products for air and water treatment since 1993.

Our unique technology and extensive expertise has made us a rapidly growing global company with installations on six continents.

Development and manufacturing is located in Sweden. In addition, we have in-house specialists for consultation, planning, installation and service.

As a Center of Excellence within air and water treatment, we also collaborate in international efforts to develop global standards for purification solutions.

At Ozonetech, we have a strong incentive to reduce energy waste, health risks and the impact on the environment. Our current solutions provide a multitude of benefits in the processing and food industry, real estate, commercial kitchens, the retail market and on yachts.
